

ReproSTAR®

A new option for *Lepto hardjo-bovis* prevention

- Protects against five strains of lepto, including *L. hardjo-bovis* – the most common cause of bovine leptospirosis¹
- 1-dose vibrio protection when ReproSTAR® VL5 HB is used
- Contains U.S. isolate of *L. hardjo-bovis*
- Small 2-mL dose
- Xtend® SP adjuvant prolongs the immune response
