- Convenient to administer: add it directly to the drinking water
- Fast acting: initial response is usually evident in 24 to 48 hours

Take pride

Denagard® Liquid Concentrate (tiamulin)

Use directions

The concentration of tiamulin in the drinking water must be adjusted to compensate for:

- Variation in water consumption due to weight or size of the pig
- Environmental temperature
- Other factors

Pigs must receive the proper drug dose each day for 5 consecutive days

- Swine dysentery – 3.5 mg tiamulin hydrogen fumarate per pound
- Swine pneumonia – 10.5 mg tiamulin hydrogen fumarate per pound

See product label for full use directions and withdrawal times.

Purchasing Denagard

Contact your local Novartis Animal Health sales representative or call customer service at 1-800-843-3386 for information on Denagard or to answer questions about its use.

Caution: Do not use undiluted. Do not use in animals other than swine. The effects of tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. **Contraindications:** Swine being treated with Denagard (tiamulin) should not have access to feeds containing polyether ionophores (e.g., lasalocid, monensin, salinomycin and semduramycin) as adverse reactions may occur.

The label contains complete use information including cautions, warnings and withdrawal times. Always read and follow the label and use directions.
