

Denagard® 10 Medicated Premix (tiamulin)

*Highly effective,
broad-spectrum antibiotic*

Controls ileitis

Proven effective in the control of proliferative enteropathy associated with *Lawsonia intracellularis* in as little as 10 days

The quickest and least expensive FDA-approved ileitis-control feed medication

Controls and treats swine dysentery

Effective against *Brachyspira (Serpulina) hyodysenteriae*

Can be used with chlortetracycline (CTC)

Denagard 10 and CTC are approved for concurrent use, providing both enteric and respiratory disease coverage, respectively

Short withdrawal times

For use in animals only

Take pride

Purchasing Denagard 10

Contact your local Novartis Animal Health sales representative or call customer service at 1-800-843-3386 for information on Denagard 10 or to answer questions about its use.

Caution: Do not feed undiluted. Do not use in animals other than swine. The effects of tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. **Contraindications:** Swine being treated with Denagard (tiamulin) 10 should not have access to feeds containing polyether ionophores (e.g., lasalocid, monensin, salinomycin and semduramycin) as adverse reactions may occur.

The label contains complete use information including cautions, warnings and withdrawal times. Always read and follow the label and use directions.
